GENETICALLY MODIFIED FOOD PROFICIENCY TESTS

Over 35 years after the first product trials, GM foods and crops remain a topic of much discussion, with some territories embracing the technology widely, some restricting the use and cultivation of GM crops and others continuing to ban their use in agriculture.

Currently there are 32 approved GM crop plants, from alfalfa to wheat, being used in the agriculture of 29 countries in 2019. This represents over 190 million hectares planted in the 29 producing countries, with a further 42 territories importing GM crops (ISAAA Brief 55 - 2019).
