EQUINE INFECTIOUS ANEMIA

ID Screen® Equine Infectious Anemia Double Antigen

Double antigen ELISA kit for the detection of antibodies directed against the p26 protein of the Equine Infectious Anemia Virus (EIAV) in horse serum and plasma.

- **Highly sensitive and specific**
- **Calibrated to detect the OIE standard positive anti-EIAV serum**
- **Fast and easy-to-use**, with results in 90 minutes

Specifications

Method	Double antigen ELISA
Species	Equine
Specimens	Serum and plasma
Coated antigen	p26 recombinant antigen
Conjugate	p26 antigen-HRP conjugate (concentrated 10X)

Ordering information

Product code	EIAED-1P	EIAED-4P
Kit format	1 plate	4 plates
Reactions	96	384
Plate format	12 x 8-well strips
