

## Indirect ELISA kit for the detection of antibodies against Mycoplasma bovis in bovine serum, plasma or milk

The ID Screen® Mycoplasma bovis Indirect is the only commercial ELISA test with:

- Excellent discriminatory capacity, giving clear positive or negative results
- Excellent reproducibility, repeatability, stability and robustness
- Excellent correlation of results between individual milk and serum samples, making the test versatile for testing beef cattle or milk samples from dairy herds
- Superior specificity and sensitivity
- Rapid protocol : results in 90 minutes
- Direct dilution of samples in the plate, with ready-to-use sample buffer

### SPECIFICATIONS

<b>Method</b>	Indirect ELISA
<b>Species</b>	Cattle
<b>Specimens</b>	Serum, plasma and milk
<b>Antigen</b>	Microplates coated with purified <i>Mycoplasma bovis</i> recombinant antigen
<b>Conjugate</b>	Anti-ruminant horseradish peroxidase (HRP) conjugate

### ORDERING INFORMATION

Product code	MBOVISS-2P	MBOVISS-5P	MBOVISS-10P
<b>Kit format</b>	2 plates	5 plates	10 plates
<b>Reactions</b>	192	480	960
<b>Plate format</b>	12 x 8-well strips	12 x 8-well strips	12 x 8-well strips

### ASSOCIATED PRODUCTS

#### Freeze-dried negative bovine milk

<b>Product code</b>	MRINEG-MILK
<b>Format</b>	2 ml

<b>Description</b>	Freeze-dried bovine milk negative for various diseases.
<b>Freeze-dried M. bovis reference serum</b>	
<b>Product code</b>	MRI- MBOVIS
<b>Format</b>	0.5 ml
<b>Description</b>	Freeze-dried bovine serum (origin: Belgium) containing anti- <i>Mycoplasma bovis</i> specific antibodies.
