

Competitive ELISA for the detection of antibodies against *N. caninum* in serum or plasma from ruminants, dogs, or other susceptible species.

- Optimized sensitivity with respect to iELISAs, while maintaining high specificity
- High robustness compared to iELISAs
- Applicable to multiple species, including ruminants and dogs

SPECIFICATIONS

Method	Competitive ELISA
Species	Ruminants, dogs and other susceptible species
Specimens	Serum or plasma
Coated antigen	Purified <i>Neospora caninum</i> extract
Conjugate	Anti- <i>N. caninum</i> -HRP (concentrated 10X)

ORDERING INFORMATION

Product code	NCC-2P	NCC-5P
Kit format	2 plates	5 plates
Reactions	192	480
Plate format	12 x 8-well strips	12 x 8-well strips

ASSOCIATED PRODUCTS

N. caninum positive freeze-dried serum

Product code	MRI-NC
Format	0.5 ml vial (freeze-dried)
Description	Freeze-dried positive bovine serum to be used as internal reference material for quality control.

Negative bovine freeze-dried serum

--	--

Product code	MRINEG-BOV
Format	1 ml vial (freeze-dried)
Description	Negative freeze-dried bovine serum to be used as internal reference material for quality control.
