

Competitive ELISA kit for the detection of anti-PPRV nucleoprotein antibodies in sheep and goat serum or plasma.

Please contact IDvet for use on other species.

- **This test does not contain any virus particles**
- **High specificity and sensitivity**
- **Straightforward and rapid protocol:** each sample is deposited only once (screening format), and results are obtained in 90 minutes
- **Convenient format:** the only commercial ELISA to supply ready-to-use, coated plates, and all other components in liquid format. Plates are supplied in strips
- **Practical:** you can easily check that all samples have been correctly deposited because the dilution buffer changes color upon addition of the sera

SPECIFICATIONS

Method	Competitive ELISA
Species	Multiple species, including sheep, goats and others
Specimens	Serum or plasma
Coated antigen	PPRV nucleoprotein (NP)
Conjugate	Anti-NP-HRP conjugate (concentrated 10X)

ORDERING INFORMATION

Product code	PPRC-4P	PPRC-10P
Kit format	4 plates	10 plates
Reactions	384	960
Plate format	12 x 8-well strips	12 x 8-well strips
