

## › Serum transport card (5 samples per card)

## The solution to easily and cheaply transport sera/whole blood

- **Cheaper and more practical:** samples may be sent by regular post at room temperature
- **Safer:** samples are dried on paper. No risk of leakage, meaning that the transfer of samples may be facilitated between countries thanks to reduced regulatory requirements
- **Faster:** no need to centrifuge samples
- **Ethical:** chicks are not culled to collect blood for testing
- **Reliable:** 100% result correlation with conventional blood collection methods – validation report available upon request
