

## The ID Rapid® PPR Antigen is a dipstick field test for detection of PPR Virus infection.

The kit demonstrates:

- High specificity (>99%) and sensitivity (100% on ocular swabs), detects all 4 lineages
- Results in less than 20 minutes
- Swab eluate samples may be sent to a lab for confirmation with the ID Screen® PPR Antigen capture ELISA, given that the sample buffer is compatible

### SPECIFICATIONS

<b>Method</b>	Antigen capture
<b>Species</b>	Ovine, caprine and other species
<b>Specimens</b>	Ocular (preferred), nasal, oral or rectal swabs
<b>Coated antibody</b>	PPRV monoclonal antibody
<b>Conjugate</b>	Anti-gp51-HRP conjugate (concentrated 10X) Anti-G1-HRP conjugate (concentrated 10X)

### ORDERING INFORMATION

<b>Product code</b>	PPRAGDIP-25
<b>Kit format</b>	25 dipsticks
