

## Indirect ELISA for the detection of antibodies against the African Swine Fever virus in oral fluids from swine.

Several reports have confirmed the presence of ASFV antibodies in swine oral fluid samples.

This kit may be used for experimental infection studies and towards a possible oral fluid-based approach to ASF diagnosis and surveillance.

### SPECIFICATIONS

<b>Method</b>	Indirect ELISA
<b>Species</b>	Swine: domestic pigs, wild boars, warthogs
<b>Specimens</b>	Oral fluids
<b>Coated antigen</b>	p32, p62, p72 ASFV recombinant proteins
<b>Conjugate</b>	Anti-multi-species-HRP conjugate (concentrated 10X)

### ORDERING INFORMATION

<b>Product code</b>	ASFOFB-2P
<b>Kit format</b>	2 plates
<b>Reactions</b>	96
<b>Plate format</b>	6 x 16-well strips
