

Indirect ELISA for the detection of anti-aMPV antibodies in chicken and turkey serum.

This kit is an excellent tool to monitor flock immune status, screen serotypes A and B and quantify MPV antibody levels pre- and post-vaccination.

Note: The same convenient protocol (buffers, incubation times and temperatures) is used for most ID Screen® poultry kits.

- **High specificity and very low background** (no risk of false positive results)
- **Short incubation times:** results in 75 minutes (30-30-15 protocol)
- **Comprehensive data analysis** with the IDSoft™ program
- **Chloroform-free egg yolk protocol coming soon for use with layers!** Egg yolk collection is easy for the veterinarian, and does not generate stress for the animal.

SPECIFICATIONS

Method	Indirect ELISA
Species	Chickens (broilers, breeders and layers) and turkeys
Specimens	Serum Egg yolk protocol under validation, consult us!
Coated antigen	Purified aMPV antigen
Conjugate	Anti-chicken-HRP (concentrated 10X)

ORDERING INFORMATION

Product code	MPVS-5P	MPVS-10P
Kit format	5 plates	10 plates
Reactions	480	960
Plate format	12 x 8-well strips	12 x 8-well strips

ASSOCIATED PRODUCTS

Ready-to-use multi-positive serum - ref. B

Product code	MRIPOS-BIRD-RTU-B
---------------------	-------------------

Format 5 ml vial

Description Ready-to-use multi-positive chicken serum, to be used with the ID Screen[®] kits: AEVS, IBDS, ILTGIS, MPVS, MG, MS, NDVNP, PMS-CHICK, REOS, SALS, SALSGPD.
To be used as internal reference material for quality control.

Ready-to-use chicken negative serum

Product code MRINEG-BIRD-RTU

Format 5 ml vial

Description Ready to use specific pathogen free (SPF) chicken serum pool.
Does not contain any antibodies against any avian pathogen. For use with all the IDvet poultry ELISA kits or for RSA testing.
