

Indirect ELISA for the detection of anti-BHV-1 antibodies in bovine milk (individual or pooled).

- **Cost-effective:** the use of milk samples makes sample collection easier and more economical
- **Accurate, robust and reliable:** high specificity and sensitivity, and excellent correlation with serum testing
- **Rapid and easy-to-use**
- **Short and overnight protocols**

SPECIFICATIONS

Method	Indirect ELISA
Species	Cattle and buffalo
Specimens	Milk (individual or pooled)
Coated antigen	BHV-1 purified lysat
Conjugate	Anti-ruminant IgG-HRP conjugate (concentrated 10X)

ORDERING INFORMATION

Product code	IBRMILK-5P	IBRMILK-10P
Kit format	5 plates	10 plates
Reactions	480	960
Plate format	12 x 8-well strips	12 x 8-well strips
