

## Indirect ELISA for the detection of antibodies against the gB protein of the avian ILT virus in chicken serum or plasma.

### For monitoring vaccination with recombinant FP-ILTgB vaccines.

- **The only commercial quantitative ELISA** for the monitoring of Vectormune® FP-LT vaccine
- A **unique solution** to substitute the visual control of vaccine uptake, which is time-consuming
- Detects **field infection** in vaccinated flocks (an increase in antibody titers is observed post-infection)
- May be used as part of **DIVA** in case of Innovax® ILT vaccinated flocks
