

Competitive ELISA kit for the detection of anti-IBV antibodies in chicken serum and egg yolk.

Applicable to both domestic and wild species, the IBV competitive ELISA is the only cELISA on the market. It offers the best combination of sensitivity and specificity of any commercial IBV ELISA, it is particularly suited to monitoring disease in wild and SPF birds.

- **High sensitivity and specificity**
- **Earlier detection of infected animals**
- **May be used with egg yolk samples** which are easier to collect and cause less stress to the layers
- **Comprehensive data analysis** with the IDSoft™ program

SPECIFICATIONS

Method	Competitive ELISA
Species	Wild birds and SPF birds
Specimens	Serum or egg yolk
Coated antigen	IBV purified antigen
Conjugate	Anti-IBV-HRP conjugate (concentrated 10X)

ORDERING INFORMATION

Product code	IBVC-2P
Kit format	2 plates
Reactions	192
Plate format	12 x 8-well strips

ASSOCIATED PRODUCTS

Ready-to-use chicken negative serum

Product code	MRINEG-BIRD-RTU
Format	5 ml vial
Description	Ready to use specific pathogen free (SPF) chicken serum pool.

Does not contain any antibodies against any avian pathogen. For use with all the IDvet poultry ELISA kits or for RSA testing.
